

2015 年 7 月 4 日托福机经逆天版汇总

口语:

Task 1

【室友困难】:室友挂了整墙的画,但很丑且占地方,不过直说又会造成对室友的打击。

【解决方案】:一男一女讨论对策,对策有二:一是忍气吞声,慢慢习惯;二是告诉她真实想法,希望她画点别的。

Task 2

人体体温的调节机制 thermal regulation:1 physical regulation 通过肌肉的颤抖产热 2 behavioral regulation 就是人热了就躲在阴影里,人冷就穿衣服。

Task 3

人体体温的调节机制 thermal regulation:

1 physical regulation 通过肌肉的颤抖产热。

2 behavioral regulation 就是人热了就躲在阴影里,人冷就穿衣服。

Task 4

【讲课要点】:Archeologists use different ways to decide the places where they should dig for ancient artifacts.

1. Surface feature of the land. E.g. New Zealand. It has a typical structure. High land? (New Zealand have Giant step to the hill.)

2. Plant: certain plants grow in certain places. E.g. Banana nuts tree were planted in Central America. These trees continue reproduction. So archeologists find the place which has banana nuts tree to dig.

综合写作

阅读说 bee 在 200 million years 前就存在了的观点受到质疑, 理由:

1 没化石。

2 没花没食物。

3 化石结构可能不是 bee 的。

speaker 反驳

- 1, 没有化石是因为那时候没树, 无法 preserve 化石。
2. bee 不是一定要 feed on 花的, 也可以是 pine tree 什么的。
- 3.通过化学物质可以断定化石那就是 bee 的。

The reading material casts doubts on the view that bees existed 200 millions years ago. However, the listening material disputes the ideas presented in the reading with several arguments.

According to the passage, bees could not have been in existence 200 millions years ago because there are not any fossils of bees from that time. In contrast, the lecture argues that fossils could not form at the time because there were no trees which preserve fossils.

What is more, the author maintains that there were neither flowers nor food for bees 200 millions years ago. Nevertheless, the professor holds that bees do not have to feed on flowers because they can feed on pine trees or other things.

Finally, the reading emphasizes that those fossils may not be of bees. On the contrary, the listening asserts that those fossils are of bees because the chemical substance of the fossils has already been tested.

Do you agree or disagree with the following statement? In the past young people depended on their parents for making decisions. Today, young people are better able to make decisions on their own.

Obviously, young people nowadays have more freedom to make their own decisions than in the past and therefore, I agree with the statement above.

On the one hand, it is a social custom for parents in the past to help their children make decisions and children seldom were able to do what they like. When children were small, males will be made to attend schools and learn to acquire skill, while females were made to stay at home and learn to make embroideries. In China, girls have to have their feet bound when they were five or six years old so that they would be able to marry a good man in the future.

Little children would suffer from great pain when their feet were bound. But they have to listen to their parents. When children grew up, their parents would help them choose their life-long partners. Young people

were not free to choose their spouse in old times.

On the other hand, however, young people now have much more freedom to choose what they like.

Take myself for instance. When I was in high school, I had to choose to learn science or liberal arts. My parents did not interfere with my decision because they knew I would make the right choice which is best for me. When in college, I fell in love with a girl and I told this news to my parents. They just asked a few questions about

the girl and said that I should be serious with the relationship. I have the freedom to choose my girlfriend and future wife. The same case goes for many other young people.

From the above discussion, we can easily see that nowadays, people do have more freedom to make decisions than in the past. Therefore, I am in agreement with the statement above.
